

How do I use Axe Chrome to automatically test accessibility?

To start: go to download your Web Accessibility Testing here

1) Click on the button at the top right: Add to Chrome.

2) Click Add extension.

3) Your extension has been added.

4) Open the page you want to investigate for accessibility. In my example, I opened https://www.bbc.com/.

5) Place your mouse on the website and click the right mouse button. Then click on inspect.

6) Click on the tool Axe:

7) Select your role:

() WELCOME TO AXE	WELCOME TO AXE						
We're very excited to show you all the new features and UI we have for axe. Before you get started, let us know your role at your organization. This will help use provide better features for the future.	We're very excited to show you all the new features and UI we have for axe. 13) You will find the result on the website in a pink bordered block.

14) Read and apply the suggested solution to resolve this accessibility issue in order to comply with the guidelines and check it after your customization.

15) Fix all errors found and your website will pass this accessibility checker with flying colours.

If you have any questions or are unable to resolve the matter, please contact your manager or contact person.
